**Sensitivity:** Confidential

Hans/Bettie,

Attached is Administrative Change One dated Febr 15, 2002 adding triglycerides to the HDL/LDL-cholesterol and total bilirubin sample taken on Days -1, 3, and 8. Since the triglyceride analysis will come from the same tube, no additional venipuncture or blood is required and thus this change can be done administratively.

Thanks,

28030\_ADM CHG
